

Hello FRC Teams!

The Dunlap Eagles Robotics Team, or DERT 2040, would like to present an exciting opportunities to all teams attending the Central Illinois Regional, hosted by Bradley University.

We are organizing an important event with possible attendance from **any persons or teams willing to help.**

This event is an exciting outreach opportunity.

Volunteers will give tours around the competition to young Girl Scouts from around Central Illinois. During this tour, students will teach what FIRST is, what it does, and how these girl scouts can participate, which will also give the girl scouts their 'Robotics' badges.

We also need volunteers to help the girls build a simple robot and film a video of their creations.

This outreach event is open to all teams willing, but a knowledge of FIRST and speaking abilities are recommended. It will take place on **Saturday morning of CIR**, to make sure volunteers won't be needed in the pit or on the field.

We hope that many teams can participate in this exciting events. Best of luck and have fun Powering Up!
